SOLID STATE RELAYS

MAGNETIC SENSORS

REED RELAYS & SWITCHES

MADE IN  
FRANCE

# DEAR CUSTOMERS AND READERS,

It is with a great feeling of pride that we are presenting today the sixth version of our "selection guide" to you. We are proud of the number and the great variety of new customers we were able to convince to join us in the last years, and also proud of the several innovating products designed and developed by our R&D teams, always eager to answer your needs.

Record financial results, extension works, investments in IT, production machines upgrading, opening of our subsidiary in China... : 2017 and 2018 have been years of exceptional enterprise for celduc® relais, which is continuing on an already great course.

We greatly care for the trust you have put in us and will always strive to continue answering your needs and requirements.

celduc® relais has gained a thorough knowledge of the market for over 50 years and controls its products entire manufacturing process, from studies to sales. It is nowadays an unquestionable expert in its 3 strategic activity fields, which are:

S=Solid State Relays & Contactors

P=Magnetic Proximity Sensors

R=Reed Relays & Switches

Don't miss out on our new relays and 3-phase solid-state relays "cel3pac" and "sightpac", but also on our autonomous smart sensors IoT and our autonomous magnetic safety sensors with built in security module...

It is clear that communication and safety are the great challenges of today and those of tomorrow even more.

This "**selection guide**" is available in 7 languages, which proves if needed, how dynamic we are on export markets. Indeed, over 70% of our production is being exported in the world, under our celduc® brand or through our OEM contracts. celduc® relais is thus present in over 60 countries.

We also would like to invite you to discover our new internet website: [www.e-catalogue.celduc-relais.com](http://www.e-catalogue.celduc-relais.com), where you can download all our technical data sheets and sales brochures, but also make good use of our search filters to find the product (s) which will fully meet your requirements.

We wish you a happy discovery of this selection guide. Looking forward to talking to you soon.

Charles PERROT  
CEO celduc®

# OUR STRENGTHS

**MORE THAN 50 YEARS OF  
HIGH QUALITY LEVEL OF  
PRODUCTION IN FRANCE.**

**ANALYSIS OF CUSTOMERS'  
REQUIREMENTS**

celduc®relais is the indisputable global expert and preferred choice of companies all over the world.

**CONSTANT PRODUCT  
DEVELOPMENT**

our experienced R & D engineers constantly work on developing 10 to 15% of new products each year.

**CONTROL OF THE  
COMPLETE CHAIN**

design, development, production, testing and marketing.

**A WORLDWIDE PRESENCE  
IN MORE THAN 60  
COUNTRIES**

for a better understanding of customer's needs and offering of solutions which fully meet their requirements.

**IN COMPLIANCE WITH THE  
MAJOR INTERNATIONAL  
STANDARDS**

our products are designed, tested and manufactured in accordance with the strictest international standards.

# celduc® relais' PRODUCTS

## SOLID STATE RELAYS

PAGES  
**02 → 38**

Commonly known as SSR, it represents 70% of the production of celduc® relais. These innovative and highly efficient components are used to control all types of loads in many industries. The three major application areas are industrial heating and temperature control, lighting control, and motor control. The advantages Solid State Relays (SSR) have compared to Electro Mechanical Relays (EMR) are well-known (see page 6). celduc® relay the sole solid state relay technology made in France for more than 50 years !

## MAGNETIC PROXIMITY SENSORS

PAGES  
**39 → 54**

Used for monitoring or controlling level, clearance, movement, position and rpm recording, the sky is the limit for these versatile sensors. These sensors are used everywhere in consumer goods or industrial sectors like automotive, aircraft or telecommunications. They are also extensively used in many automation applications in the manufacturing sector.

## "REED" RELAYS & SWITCHES

PAGES  
**55 → 56**

Our Reed switches are used in our own magnetic proximity sensors & reed relays . They have proved to last for more than 50 years. The range meets the demands of an increasing number of new applications thanks to their ease of operation, compact size and reliability.

# SOLID STATE RELAYS

## MAIN APPLICATIONS

EVERY DAY NEW APPLICATIONS CALLING FOR RELIABILITY, SILENT SWITCHING AND LONG LIFE TIME UTILIZE OUR HIGHLY INNOVATIVE SOLID STATE RELAYS.  
HERE ARE SOME EXAMPLES :

### HEATING

Plastic injection molding, Furnaces, Power supply distribution systems, Air conditioning, Textile, Home heating, Infrared heating, Drying, Thermoforming, Etc.

### MOTOR STARTING

Pumps, Compressors, Plastic injection molding, Conveyors, Fans, Etc.

### LIGHTING

Public lighting, Cinema, Theatre lamps, Airport runway lamps, Road lighting, Etc.

### CONTROL

PLC interface, Heating element control, Solenoid valves, Contactor Coils, Optocoupling of sensors

### MISCELLANEOUS

Transformer starting, Power factor corrector, Uninterrupted power supplies, Energy source switching, Capacitors control

## IN COMPLIANCE WITH THE STANDARDS SPECIFIC TO EACH INDUSTRY

IN MANY AREAS, THE COMPONENTS USED IN THE EQUIPMENT MUST MEET VERY STRICT REQUIREMENTS THAT ARE SPECIFIC TO EACH INDUSTRY.

All of our relays okpac® SO (as well as SC relays), celpac® 2G SU/ SA (including the current sense module ESUC) but also the 2-phase SOB and 3-phase SGT comply with the European standard **EN 61373** for railways : shocks and vibrations tests on relay.

Regarding the standards about Fire behavior and fumes NF F16-101, NF F16-102 and **EN 45545** calling for the EN 60695-2-10/11/12 (Glow Wire tests (GWFI –

GWIT), blue and black plastic covers and encapsulating resin of SO and SU/SA relays are classified. Our products are also compliant with the **EN 50155** standard which applies to all electronic equipment for control, regulation, protection and power supply used on rolling stock.

Some of our products fulfil the requirements according to **EN 60601-1** (VDE 0750) for medical applications

# SOLID STATE RELAYS

## STANDARDS

QUALITY IS OF PARAMOUNT IMPORTANCE AND MAINTAINED AT ALL TIMES, AIDED BY OUR OWN SPECIALLY DEVELOPED IN HOUSE TESTING EQUIPMENT. OUR PRODUCTS ARE MANUFACTURED IN ACCORDANCE WITH THE MAJOR INTERNATIONAL STANDARDS

- The solid state relays and contactors made by celduc® relais are manufactured in compliance with major international standards :
  - IEC/EN60947-4-3 for the other loads
  - IEC/EN60947-4-2 for motor control
  - IEC 62314
  - American and Canadian (UL, cUL, CSA)
  - IEC/EN 60950 – VDE0805
  - IEC60335-1 – VDE0700-1
 Our products also meet the major European directive regarding the CE marking.
- In the UL508A standard, the estimated short-circuit current is called the SCCR: Short Circuit Current Rating. Since 1 April 2015, our solid state relays have successfully obtained the UL SCCR 100kA approval. In fact, some customers request a supplement to the approval with a SCCR higher than 5kA according to a UL 508A appendix called "supplement SB".
- Some of our products fulfil the requirements for KOSHA (S-MARK) and for EAC (Russia-CIS).
- The manufacturing process of our relays complies with the ISO9001 requirements version 2008. We incorporate highly reliable components with a very high electromagnetic interference level which give to our products the highest life-time one can find one the market.

## celduc® relais and SPECIAL CUSTOMER PRODUCTS

CELDUC® RELAIS DESIGN SPECIFIC PRODUCTS ACCORDING TO THE CUSTOMERS SPECIFICATIONS AND ADAPT PRODUCTS TO THE CUSTOMERS NEEDS.

**Special development composed of SU SSRs and ESUC modules**  
to control 9 heating elements with partial load break detection. This system includes all protections.

**Motor reverser**  
with 2 electronic cards included 5 SSRs.

**Solid state contactor for 3 phase motor.**  
Dry contact control Spring terminals.

**Solid State Relays with IO-Link communication**  
Because communication is a one of the great challenges of today, and an even bigger challenge of tomorrow!

## SOME TECHNICAL REMINDERS ..... 6 to 7

## INTERFACE RELAYS ..... 8 to 9

- SLA / SLD / SPA / SPD ..... 8
- XK - DIN-rail mounting ..... 9

## PCB RELAYS ..... 10 to 11

- SKA / SKB / SKL ..... 10
- SKH - with integrated heatsink ..... 11
- SN8 - ultra-miniature and compact package ..... 11
- SHT - three-phase solid state relays ..... 11

## SINGLE PHASE SOLID STATE RELAYS ..... 12 to 23

- SO7 - okpac® range - random ..... 13
- SO8 - okpac® range - zero-cross – for most types of loads ..... 13
- SO9 - okpac® range - zero-cross – for resistive loads AC-51 ..... 14
- SOL - flatpac® range - low profile ..... 14
- SON - EMC optimized ..... 14
- SOP - Starting transformer ..... 15
- SOR - with removable input connector – spring terminals ..... 15
- SC7 / SC8 / SC9 - Previous generation ..... 15
- SA / SAL / SAM - celpac® range – with screw connection on inputs 16-17
- SU / SUL / SUM - celpac® range – with pluggable connector on inputs 18
- ESUC - current monitoring module ..... 19
- ECOM - temperature controller, current monitor and communication interface ..... 19
- SILD / SOD / SOI - power SSRs with diagnostics ..... 20-21
- SF - miniatures relays – with FASTON or PCB terminals ..... 22
- SCF - for resistive loads AC-51 – with FASTON terminals ..... 22
- SCFL - EMC optimized – with FASTON terminals ..... 22
- SP7/SP8 - for most types of loads – with FASTON terminals ..... 23
- SCQ - four-leg solid state relays ..... 23
- ST6 - flashing relays ..... 23

## TWO-PHASE SOLID STATE RELAYS ..... 24 to 25

- SOB5 – with FASTON terminals ..... 24
- SOB6 - double input with connector CE100F ITWPANCON type or similar ..... 24
- SOB7 - random ..... 24
- SOB8 / SOB9 - zero-cross ..... 25
- SOBR - with "push-in" style spring power connectors ..... 25
- Accessories for SOB – connectors ..... 25

## THREE-PHASE SOLID STATE RELAYS ..... 26 to 28

- SMB - sightpac® 45mm – 2 leg three-phase SSRs ..... 27
- SMT - sightpac® 45mm ..... 27
- SGB - cel3pac® - 2 leg three-phase SSRs ..... 27
- SGT - cel3pac® ..... 28

## RELAIS STATIQUES POUR CONTRÔLE MOTEUR ..... 29 to 30

- SMR / SG9 / SV9 / SW9 - AC reversing switches ..... 29
- XKRD / SGRD - DC reversing switches ..... 29
- SYMC - AC single phase softstarter ..... 30
- SMCV/SMCW - AC three-phase softstarter ..... 30

## CONTROLLERS ..... 31 to 35

- Which control mode to choose? ..... 31
- SG4 / SO4 / SIL4 / SIM4 - phase angle controllers ..... 32-33
- SO3 - burst control mode ..... 33
- Multizones power controller ..... 33

## HEATSINKS & ACCESSORIES ..... 38

# SOLID STATE RELAYS

## WHAT IS A SOLID STATE RELAY / CONTACTOR?

Solid state relays are switching devices made with electronic components. We use the word "relays" by analogy with electromechanical relays which have galvanic isolation of the control circuit and the switched circuit. "Solid state" refers to the fact that these devices do not have moving parts.

A solid state relay switches a power (AC or DC) to a load and provides electrical insulation between the control circuit and the load circuit. This technology is in competition with or in addition to electromechanical relays and other switching technologies such as mercury switches and relays.

Composition of a solid state relay:

## ADVANTAGES OF SOLID STATE SWITCHING

**LONG LIFE :** solid state relays do not have moving mechanical parts subject to wear and tear or deformation. When used well, a solid state relay has a lifespan 200 times longer than that of an electromechanical relay (EMR).

**VERY LOW ENERGY CONSUMPTION:** a low drive power will allow solid state contactors and relays to switch strong power loads.

**SILENT OPERATION:** this technology does not generate acoustic noise while the outputs are changing state. This is a very important advantage for domestic and medical uses.

**SHOCK AND VIBRATION RESISTANCE:** No risk of accidental switching with solid state technology.

**VERY HIGH SWITCHING FREQUENCY.** allowing a very high degree of accuracy for regulation (temperature, etc.)

**OTHER TYPES OF CONTROLS** (precise choice of the moment of switching) and possible diagnostic functions.

## ZERO-CROSS RELAY OR RANDOM RELAY?

In the case of a **ZERO VOLTAGE CONTROL (OR ZERO-CROSS RELAY)**, power switching takes place only at the beginning of the alternation after the control has been applied. In fact, switching the power component is only permitted in the area around the zero crossing.

In the case of resistive or capacitive loads, it is preferable to use zero-cross relays which in this way limit the di/dt, disturbances on the network and increase the lifetime of the load and the relay.

In the case of an **INSTANTANEOUS CONTROL (OR RANDOM RELAY)**, power switching takes place as soon as the control voltage has been applied (turn on time less than 100µs). This type of control is more suited to all high INDUCTIVE loads because of the phase difference between current and voltage.

It is also suited to systems requiring an immediate switching.

**REMINDERS :** Zero-cross all loads: SO8, SA8, SMT8,  
Zero-cross resistive loads: SO9, SUL9, SGT9,  
Random: SO7, SUL7, SGT7,

# SOLID STATE RELAYS

## THYRISTOR RATING VS SWITCHING CURRENT

The switching components of solid state relays for alternating currents are thyristors. The ratings of our power components are specified in this catalogue. However, solid state relays must be mounted on heatsinks in order to obtain nominal performance. "Thyristor rating", which is an indication of the size of the power component, must not be confused with "switchable current" which depends on the construction and use of the relay or contactor. To match the switchable current by the relay and your application, you must refer to the tables and

thermal curves in our technical datasheets for products that are not equipped as standard with heatsinks.

Our solid state relays are fitted with back-to-back thyristors and use 4th generation TMS<sup>2</sup> technology with a very high life expectancy compared to the majority of products on the market (application note on request).

## VOLTAGE PROTECTION

Strong  $dv/dt$ s may appear at the solid state relay terminals. These can also be generated by mains interference or by the zero-cross current turn-off on inductive load. In relays adapted to most loads, celduc® relay uses high immunity components and sometimes an RC protection network.

Overvoltages can also occur in the mains and cause the turn on of the solid state relay, even in the absence of control. To solve this problem, celduc® uses 1200 V or even 1600 V components, and, in certain ranges, includes a overvoltage limiter called a varistor or a VDR (Voltage Dependent Resistor), placed at the solid state relay terminals on the socket side. For relays suited to resistive loads, celduc relay® also offers an active limiter (TVS diodes on triggers) which closes the relay on an overvoltage to protect it.

## CURRENT PROTECTION

→ **BY FUSE:** fuses, notably ultra-fast fuses for smaller ratings, must be used to protect solid state relays against short-circuits of the load. The  $I^2t$  value of the fuse must be less than half of the  $I^2t$  value of the relay.  
 → **BY CIRCUIT BREAKER:** this method of protection can be adapted to solid state relays with a  $I^2t$  value > 5000 A<sup>2</sup>s.  
 (technical note on request).

## RELAY COOLING / HEATSINK

Solid state relays have some energy losses in the form of heat. This heat must be dissipated so that the junction temperature (at the core of the power element) does not exceed the specified values : 125°C or 150°C (value dependent on the power components).

Heatsink must be selected so that the junction temperature isn't exceeded at the design current and ambient temperature. The determination of the heatsink can be done either by calculation or directly from the graphs provided by celduc® relay on the technical data sheets available on the website [www.e-catalogue.celduc-relais.com](http://www.e-catalogue.celduc-relais.com)

# INTERFACE RELAYS

100% compatible with  
electromechanical  
relays

## SLIM

→ Miniature

The SLA / SLD solid state relays are 100% compatible with 5 mm pitch electromechanical relays. They can be soldered direct to PCBs or plugged into all din rail mountable bases. Every type of loads can be switched and those relays can withstand high current peaks that can be produced by loads such as electro valves, engines, coils, indicator, etc. The switching power is 2A/280VAC for SLA and 2.5A/60VDC or 4A/24VDC for SLD relays.

	Product reference	Switching current	Switching voltage	Control voltage	Protec. / Specifications
AC	SLA03220	2A	12-280VAC	18-32VDC	RC
	SLA03220L	2A	12-280VAC	18-32VDC	RC Very low leakage current model
DC	SLD01205	4A	0-32VDC	3-10VDC	Transil
	SLD01210	2.5A	0-60VDC	3-10VDC	
	SLD02205	4A	0-32VDC	7-20VDC	
	SLD03205	4A	0-32VDC	18-32VDC	
	SLD03210	2.5A	0-60VDC	18-32VDC	

Other miniature solid state relay options are available on request.

### SLA / SLD

- Dim. 28 x 5 x 15 mm

## ACCESSORY

Product reference	Specifications
ESD01000	SLA/SLD base for PCB for one relay

## SP-ST

→ Standard

AC and DC from 1 to 5A, protection by VDR or built in Transil, available in 15,7 mm (ST Series) and 25,4 mm (SP Series).

	Product reference	Switching current	Switching voltage	Control voltage	Protec.
AC	SPA01420	4A	12-275VAC	4-16VDC	VDR
	SPA07420	4A	12-275VAC	12-30VDC / 15-30VAC	
	STA07220	2A	12-275VAC	12-30VDC / 15-30VAC	
DC	SPD03505	5A	0-30VDC	12-30VDC	Transil
	SPD07505	5A	0-30VDC	12-30VDC / 15-30VAC	
	STD03205	2.5A	0-30VDC	12-30VDC	
	STD03505	5A	0-30VDC	12-30VDC	
	STD03510	5A	0-68VDC	12-30VDC	
	STD07205	2.5A	0-30VDC	12-30VDC / 15-30VAC	

Our STD and SPD modules can be modified, on request, with an output voltage of 100VDC. Other control voltages are available on request.

### SPA / SPD

- Dim. 29 x 12.7 x 25.4 mm

### STA / STD

- Dim. 29 x 12.7 x 15.7 mm

## ACCESSORY

Product reference	Specifications
ESD05000	SP/ST base for DIN rail for one relay

# INTERFACE RELAYS

## XK

→ DIN-rail mounting

Interface relays to control loads such as resistors, indicators, solenoids, transformers, motors, power contactor coils. These DIN-rail mounted products are available with AC and DC output options. They can also be supplied as dedicated motor control variants such as 2 and 3 phase switching and motor rotation reversal. All are fitted with LED indicators.

	Product reference	Switching current	Switching voltage	Control voltage	Protec.	Specifications
AC	XKA20420	5A	12-275VAC	6-30VDC	VDR	1 pole AC zero-cross output
	XKA20420D	5A	12-275VAC	6-30VDC	VDR	
	XKA20420R	5A	12-275VAC	6-30VDC	VDR	
	XKA70420	5A	12-275VAC	15-30VAC/DC	VDR	
	XKA70440	5A	12-440VAC	12-30VAC/8.5DC	VDR	
	XKA90440	5A	12-440VAC	150-240VAC/DC	VDR	
	XKH20120	10A	12-280VAC	10-32VDC	VDR	1 pole AC random output

	XKLD31006	10A	12-36VDC	10-30VDC	diode	DC output - MOSFET technology

▲  
 Suffix D: removable terminals.  
 Suffix R: removable spring terminals.

**XKLD0020 has all protections included and is designed for inductive loads with high switching frequency :**

- Diagnostic status output (potential free)
- Control visualization by green LED
- Output DC visualization by red LED
- Built-in clamping voltage
- Built-in free wheel diode
- This product also includes a fuse on board to protect the installation.

	Product reference	Switching current	Switching voltage	Control voltage	Protec.	Specifications
DC	XKLD0020	4A	24-96VDC	18-32VDC	VDR+diode	1 pole DC output Diag. Output 1-32VDC 100mA

## MOTOR CONTROL

	Product reference	Switching current	Switching voltage	Control voltage	Protec.	Specifications
	XKM22440	5AC-51 / 2.5AC-53	24-460VAC	15-40VDC	VDR	2 poles motor switching control
	XKR24440	5AC-51 / 2.5AC-53	24-460VAC	15-40VDC	VDR	AC motor change-over control
	XKRD30506	5A-DC	12-24VDC	7-30VDC	diode	DC motor change-over control

▲  
 The ready to use module XKRD30506 for Din-Rail mounting comprises 4 Solid State relays wired as a reverser to be used to change the direction of a DC motor (100W @ 24Vdc).

**XKA/XKD**

- Dim. 12.2 x 76.4 x 53 mm or
- Dim. 17.2 x 76.4 x 53 mm depending on models

**XKH**

- Dim. 25 x 76.4 x 65 mm with integrated heatsink

- Dim. 36 x 78 x 61 mm

**XKM**

- Dim. 25.2 x 76.4 x 53 mm

**XKR/XKRD**

- Dim. 58.2 x 76.4 x 53 mm

# PCB RELAYS

## SKA SKB

The SK range for PCB mounting is available in different models :  
SKA/SKB (AC output) or SKD/SKLD (DC output).  
→ SKA up to 5A 230 or 400VAC with built-in voltage protection, ideal for solenoid or motor control.  
→ SKB up to 5A 230 or 400VAC for resistive loads.

Product reference	Current	Switching voltage	Control voltage	LED	I <sup>2</sup> t	Protec.	Specifications

## SKL

SKL for AC output with a ceramic substrate that can be mounted on a heatsink. The SKL is available with current ratings from 16A to 75A.

For the power element, our SKL use TMS<sup>2</sup> technology reducing thermal stress and considerably improving life expectancy. Ideal for motor or lamps control (I<sup>2</sup>t up to 5000 A<sup>2</sup>s) with high inrush current as well as heating applications. Easy to protect against short circuit with micro circuit breakers.

Product reference	Max. current with WF032000	Thyristor rating	Switching voltage	Control voltage	I <sup>2</sup> t	Specifications
SKL10120	16A	16A	12-280VAC	4-14VDC	128A <sup>2</sup> s	AC zero-cross output

• Dim. 81.28 x 8.26 x 27.69 mm

## APPLICATIONS

Electromagnets , Lamps,  
Contactors Starting current  
I<sub>d</sub> = 1.4xI<sub>n</sub>

**SKA**

Heaters

I<sub>d</sub> = 1.4xI<sub>n</sub>

**SKB / SKL**

Infrared lamps  
or lighting lamps  
I<sub>d</sub> = 10xI<sub>n</sub>

**SKL / SKH**

Motors

I<sub>d</sub> = 8xI<sub>n</sub>

**SKL / SKH**

# SINGLE PHASE SOLID STATE RELAYS

All our solid state relays fitted with back to back thyristors (power products : single phase, two phase, three phase) now use TMS<sup>2</sup> technology with a very high life expectancy compared to the majority of products on the market (application note on request).

## okpac<sup>®</sup> Innovation Performances et Design !

- Versatile, easy and quick connections
- Removable IP20
- Same screwdriver for outputs and inputs
- Tightening on metal baseplate not on plastic
- Removable control terminals
- SSR, mains and load status.
- Output voltage from 24 to 690 VAC (600V-1200V-1600V peak)
- Very low zero-crossing level
- Large and regulated AC and DC input voltage
- Control status LED
- EMC compatible for industrial environment
- UL/cUL, VDE (EN60950), IEC/EN60947-4-3, CE marking
- I<sub>tsm</sub> up to 2 000A and I<sup>2</sup>t > 20 000A<sup>2</sup>s
- Protection against circuit breaker.

### VERSATILE, EASY AND QUICK CONNECTIONS

#### POWER WIRING

**Direct connection by wire or tip**  
2 x 6 mm<sup>2</sup> (AWG10) fine strand i.e. 32A  
2 x 10 mm<sup>2</sup> (AWG8) solid i.e. 50A

**With tips with contained palm**  
Up to 50mm<sup>2</sup> (AWG1) with or without special adaptations i.e. 150A

**Screw with brake washers**  
Better behaviour with shocks and vibrations

#### CONTROL WIRING

**Screws connection**  
(SO7 / SO8 / SO9 / SOL)

**Removable spring terminals**  
(SOR)

**REMINDER**

- SO7** RANDOM
- SO8** ZERO-CROSS ALL KINDS OF LOADS
- SO9** ZERO-CROSS RESISTIVE LOADS

# SINGLE PHASE SOLID STATE RELAYS

## okpac®

celduc® offers  
"ready to use"  
solutions with  
integrated heatsink.

## SO7

→ Random

Typical applications : Motors (AC-53), inductive loads and phase angle control applications.  
- Random or instant switching  
- Voltage protection on input (transil) and output (RC and VDR) depending on models.

Product reference	Thyristor rating	Switching voltage	Peak voltage	Control voltage	I <sub>t</sub>	Protec.
SO745090	50A	12-275VAC	600V	3-32VDC	2 800A <sup>2</sup> s	RC-VDR
SO763090	35A	24-510VAC	1200V	3.5-32VDC	1 250A <sup>2</sup> s	RC-VDR
SO765090	50A	24-510VAC	1200V	3.5-32VDC	2 800A <sup>2</sup> s	RC-VDR

SO769090	125A	24-510VAC	1200V	3.5-32VDC	24 000A <sup>2</sup> s	RC-VDR
SO789060	125A	24-690VAC	1600V	3.5-32VDC	22 000A <sup>2</sup> s	-

• Dim. 45 x 58.5 x 30 mm

These products should be mounted on heatsinks in order to reach nominal current.

## SO8

→ Zero-cross for  
most types of loads

SO8 range designed for most types of loads  
→ Zero cross with low zero-crossing level (<12V)  
→ Voltage protection on input (transil) with very high immunity according to IEC/EN61000-4-4 depending on models  
→ Control current < 13mA for all the voltage range at any operating temperature.

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 44.5 x 58.2 x 27 mm

# SINGLE PHASE SOLID STATE RELAYS

**celpac<sup>®</sup> 2G** The 22,5mm pitch SSR solution

## Performances & reliability

- Fixing screws compatible with all hockey puck style relays (celduc SO and SC range),
- Maximum voltage up to 1600V (690VRMS), 600VAC and 1200VAC as standard,
- Thyristor rating up to 75A,
- Large input range : 3-32VDC with regulated current models,
- AC input control available,
- Input status yellow LED,
- Over-voltage protection on input,
- New generation of TMS<sup>2</sup> technology for thyristors for a longer life expectancy,
- Quick and easy connections,
- Designed according to European standards EN60947-4-3 (IEC947-4-3) and EN60950 (VDE0805 reinforced insulation) IEC62314-UL-cUL,
- IP20 protection with removable flaps (SU range) or cover (SA range),
- Other protection devices available as an option : RC snubber, VDR, self turn-on.

## Price-effective and compact solution

- The 22,5 mm pitch of our Solid State contactors reduces space to the minimum,
- Reduced assembling time, easy cabling,
- Reduced maintenance thanks to a very long life expectancy,
- One single screw driver for input and output.

## REMINDER

<b>SA/SU 8</b>	ZERO-CROSS ALL KINDS OF LOADS
<b>SA/SU 9</b>	ZERO-CROSS RESISTIVE LOADS
<b>SA/SU 7</b>	RANDOM

## "READY TO USE" VERSIONS

<b>SA/SU L</b>	22,5MM HEATISNK- 3K/W
<b>SA/SU M</b>	45MM HEATSINK - 2,2K/W

## VERSATILE, EASY AND QUICK CONNECTIONS

	Gamme SA	Gamme SU
POWER WIRING	 <p>Direct connection by wire or tip</p>	
CONTROL WIRING	 <p>with screw connection on inputs</p>	 <p>with pluggable connector on inputs</p>

## AS AN OPTION

Two modules are available directly pluggable on our SSR type SU and SUL  
**SAVE ROOM**  
**SAVE COSTS**  
**ADD MORE FUNCTIONS**

→ Current monitoring module

→ Temperature controller PID, current monitor and communication interface in one unit

# SINGLE PHASE SOLID STATE RELAYS

## celpac<sup>®</sup> 2G

### The 22,5mm pitch SSR solution

Our SA range has a connection on the power side and the control side by screws. Our parts include a transparent protective cover and some models are "ready to use" with integrated heatsinks (SAL and SAM versions).

**SA range** with screw connection on inputs

## SA

→ For mounting on your heatsink or panel mount

**SA8** : designed for most types of loads / integrated VDR protection

**SA9** : designed for resistive loads AC-51

Product reference	Thyristor rating	Switching voltage	Peak voltage	Switching current	I <sup>t</sup>

# SINGLE PHASE SOLID STATE RELAYS

## celpac® 2G

### The 22,5mm pitch SSR solution

Our SU range comes with plug-in connectors. Our parts include removable protective components and some models are "ready to use" with integrated heatsinks (SUL and SUM versions).

SU range with pluggable connector on inputs

## SU

→ For mounting on your heatsink or panel mount

**SU7** : designed for motors AC-53 and inductive loads.

Also use in phase angle control systems

**SU8** : designed for most types of loads / integrated VDR protection

**SU9** : designed for resistive loads AC-51

Product reference	Thyristor rating	Switching voltage	Peak voltage	Switching current	I <sup>t</sup>
SU765070	50A	24-510VAC	1 200V	3.5-32VDC	1 680A <sup>2</sup> s
SU842070	25A	12-275VAC	600V	3-32VDC	600A <sup>2</sup> s
SU842770	25A	12-275VAC	600V	18-30VAC/DC	600A <sup>2</sup> s
SU842970	25A	12-275VAC	600V	160-240VAC	600A <sup>2</sup> s
SU865070	50A	24-510VAC	1 200V	3.5-32VDC	1 680A <sup>2</sup> s
SU865770	50A	24-510VAC	1 200V	18-30VAC/DC	1 680A <sup>2</sup> s
SU865970	50A	24-510VAC	1 200V	160-240VAC	1 680A <sup>2</sup> s
SU867070	75A	24-510VAC	1 200V	3.5-32VDC	7 200A <sup>2</sup> s

# SINGLE PHASE SOLID STATE RELAYS

## celpac<sup>®</sup> 2G

The 22.5mm pitch SSR solution

Two modules are available directly pluggable on our SSR type SU and SUL

SAVE ROOM / SAVE COSTS / ADD MORE FUNCTIONS

## CURRENT MONITORING MODULE

### ESUC

Combined with our SU/SUL

#### ADD TO YOUR SSR

Diagnostic information for up to 5 heaters in parallel with :

- Permanent load current monitoring,
- Current teaching function,
- 2 alarm thresholds (+/-16%),
- Partial load break detection,
- Open load detection,
- Detection of short-circuited SSR.

Référence produit	Plage de courant	Commande
ESUC0450	2-40A	8-30VDC
ESUC0480	2-40A	24-45VDC
ESUC0150	1-10A	8-30VDC

#### WHY CHOOSING THIS FUNCTION ?

- Quick fault detections (instantaneous alarm)
- Maintenance
- To detect when a heater is broken which brings problems and is difficult to locate
- To maintain good quality production for plastic/rubber machines (specially thermosetting machines).
- 22.5mm wide with integrated heatsink and DIN rail adaptor
- Reduction of quantity, cost and time of wiring.

## TEMPERATURE CONTROLLER PID, CURRENT MONITOR AND COMMUNICATION INTERFACE IN ONE UNIT

### ECOM0010

Combined with our SU/SUL

#### ADD TO YOUR SSR

- Temperature controller with :
  - PID with automatic or manual settings,
  - Insulated inputs for J, K, T, E thermocouples, PT100 to come
  - Auxiliary output for heating, cooling, alarm or to control a 3 phase Solid State Relay,
  - Loop and heater break alarms.
- Current monitoring and alarms up to 50A.
- RS485 communication interface / Modbus RTU (others on request)
- Power supply : 24Vdc +/- 10%

#### WHY CHOOSING THIS FUNCTION ?

- The ECOM is the most compact solution available on the market that incorporates the latest measuring and control technology.
- This solution can answer the needs of cost reduction of electrical cabinets (smaller), PLC (less analogue and digital I/O's) and wiring (bus communication).

# POWER SSRs WITH DIAGNOSTICS

celduc® relais offers different relay diagnosis solutions. These relays inform the user of the load status (resistive load), the output of the relay and the network.

## WHICH SOLUTION TO CHOOSE?

Here are a few examples of the needs of our customers

### NEED

- 1 RELAY for 1 heating element + 1 detection element
- 1 RELAY for 1 heating element + 1 rapid detection element + compact solution and ready to use solution

### SOLUTIONS

- SOD
- SILD

### ADVANTAGES

(for both SOD and SILD)

- These relays inform the user of the load status (connected or not), the relay output (closed or not) and the network (state of the fuse or circuit breaker) in the power circuit, thanks to an NC (Normally Closed) diagnostic contact.
- Potential free
- A single input PLC and can be placed in a series
- Simple use
- The diagnostic function does not require an external power supply
- Short reaction time < 100 ms

### NEED

Connection or disconnection of the heat zones

This is the case of thermoforming machines, for example, where it is necessary to adapt the heating surface to the size of the plastic sheets to be preheated. Solid state relays with standard diagnosis display an error if a heat zone is disconnected, which requires a particular or even complex management of diagnosis signals.

### SOLUTIONS

- SOI

### AVANTAGES

- The SOI range allows for the switching of the load current and provides simply the information of the presence (or lack thereof) of the output current which must then be interpreted by the user or the system.

### NEED

Reading of the current and alarms via a communication interface

### SOLUTIONS

- Combined ECOM module with our SU / SUL solid state relays

### ADVANTAGES

- This product, which has been designed for temperature regulation (built-in PID), can also be used for:
  - Measuring the load current
  - Measuring the room temperature, the process or even the relay or its heatsink (built-in thermocouple input J, K, T, E)
  - Creating alarms (current, temperature, relay status)
  - Chrono-proportional control to adjust the power on the load
- It communicates via a RS485 link and the MODBUS RTU protocol.
- In order to view the states locally, it incorporates 3 LEDs and a configurable output.

### NEED

1 relay for several loads + need for a compact and ready to use solution

### SOLUTIONS

- ESUC current detection module combined with our SU/SUL solid state relays

### ADVANTAGES

- Detection of partial load break or current surge (works up to 5 identical loads)
- Three-phase or possible multizone use
- Space-saving with a 22.5 mm width only

# POWER SSRs WITH DIAGNOSTICS

## DIAGNOSTIC RELAY

Our range of diagnosis relay comes in celpac housing (ready to use) with our SILD and okpac® range (to mount on heatsinks) with our SOD and SOI.

These relays inform the user of the load status (resistive load), the output of the relay and the network through an NC (Normally Closed) diagnostic contact. The diagnostic function does not require an external power supply (celduc® patent) The contacts of various relays

can be placed in a series. It is possible to use these relays for a diagnosis in a three-phase system, star wiring without neutral.

Our SOI range includes a current transformer (CT) as well as a contact for signalling and therefore enables the switching of the load current by giving only the information of the presence of the output current which must then be interpreted by the user or the system.

## SILD

The SILD range of diagnosis relay is in celpac housing (ready to use).

Product reference	Thyristor rating	Max. switching current at 25°C	Switching voltage	Peak voltage	Switching current	I <sup>t</sup>
SILD845160	50A	32A	70-280VAC	600V	3-32VDC	1 500A <sup>2</sup> s
SILD865170	50A	32A	150-510VAC	1 200V	3.5-32VDC	1 500A <sup>2</sup> s
SILD867170	75A	35A	150-510VAC	1 200V	3.5-32VDC	5 000A <sup>2</sup> s

• Dim. 22.5 x 80 x 116 mm

## SOD

Product reference	Thyristor rating	Switching voltage	Peak voltage	Switching current	I <sup>t</sup>
SOD843180	35A	50-265VAC	600V	7-30VDC	1 250A <sup>2</sup> s
SOD845180	50A	50-265VAC	600V	7-30VDC	2 800A <sup>2</sup> s
SOD849180	125A	50-265VAC	600V	7-30VDC	22 000A <sup>2</sup> s
SOD865180	50A	150-510VAC	1 200V	7-30VDC	2 800A <sup>2</sup> s
SOD867180	75A	150-510VAC	600V	7-30VDC	7 200A <sup>2</sup> s

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 45 x 58.5 x 33.6 mm

## SOI

NEW

**OPERATION:** By applying or removing a voltage on the control input, the SOI relay switches or interrupts the current in the load. If the value of the load current is greater than the threshold that was preset in the factory, the current transformer included in the SOI will close the contact for signalling. It therefore indicates that a current is flowing into the load and leaves the user or the system to interpret this status.

### ADVANTAGES

- Reduction of quantity, cost and time of wiring
- Elimination of the need to pass the power cables through a current transformer
- Elimination of costly analogue inputs on the PLC

Product reference	Thyristor rating	Switching voltage	Peak voltage	Switching current	I <sup>t</sup>
SOI885070	50A	24-625VAC	1 600V	3.5-32VDC	2 800A <sup>2</sup> s

These products should be mounted on heatsinks in order to reach nominal current.

# SINGLE PHASE SOLID STATE RELAYS

## SSR with FASTON terminals

Solid State Relays with "FASTON" terminals are appropriate mainly for the food industry and for switching current < 20A.

celduc® relays offers a wide range of single phase SSR with "FASTON" terminals, but also two-phase SSR (see page 24) and four-legs SSR (see SCQ range page 23).

## SF

Miniature relays available with "FASTON" or PCB terminals.

Product reference	Thyristor rating	Switching voltage	Control voltage	Specifications
SF541310	10A	12-280VAC	4-30VDC	Zero-cross, "FASTON" terminals
SF542310	10A	12-280VAC	4-30VDC	Zero-cross, PCB terminals
SF546310	25A	12-280VAC	4-30VDC	Zero-cross, "FASTON" terminals

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 21 x 35.5 x 15 mm

## SCF

To control resistive loads. "FASTON" terminals.

Product reference	Thyristor rating	Switching voltage	Peak voltage	Control voltage	LED	I <sub>t</sub>	Protec.
SCF42160	25A	12-280VAC	600V	4-30VDC	yes	312A <sup>2</sup> s	-
SCF42324	25A	12-280VAC	600V	12-30VDC	no	312A <sup>2</sup> s	VDR
SCF62160	25A	24-600VAC	1 200V	5-30VDC	yes	265A <sup>2</sup> s	-

These products should be mounted on heatsinks in order to reach nominal current.

E option "large Entraxe" and L option "Faston" 4,8mm on request.

• Dim. 44.5 x 58 x 33 mm

## SCFL

→ EMC optimised  
(low electromagnetic emission – low RFI)

These relays are designed for use in applications where low electromagnetic emission is essential : household and electrical appliances, information technology and medical equipments. In compliance with EN 50081-1 Generic Emission Standards for Residential.

See also our SON range page 14.

Product reference	Thyristor rating	Switching voltage	Peak voltage	Control voltage	I <sub>t</sub>
SCFL42100	25A	12-280VAC	600V	4-30VDC	312A <sup>2</sup> s
SCFL62100	25A	24-440VAC	1 200V	5-30VDC	312A <sup>2</sup> s

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 44.5 x 58.2 x 32 mm

# SINGLE PHASE SOLID STATE RELAYS

- For a quick connection !

## SP7/SP8

This new range extends the products available with FASTON terminals. In a full plastic case, these relays can nevertheless switch up to 12 A AC51. These relays are appropriate for any type of loads (such as heating or single-phase random motor) thanks to high immunity components and an integrated overvoltage protection combined with 800 Upeak power components. This range is well adapted to the food industry.

Product reference	Thyristor rating	Switching current AC-51	Switching voltage	Peak voltage	Control voltage	I <sup>2</sup> t	Specifications
SP752120	25A	12A	12-280VAC	800V	3-32VDC	340A <sup>2</sup> s	Random
SP852120	25A	12A	12-280VAC	800V	4-32VDC	340A <sup>2</sup> s	Zero-cross

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 38 x 66.8 x 22 mm

## SCQ

→ Four-Leg Solid State Relays

Product reference	Thyristor rating	Switching voltage	Peak voltage	Control voltage	I <sup>2</sup> t	Led	Specifications
SCQ842060	4x25A	12-280VAC	600V	3-32VDC	288A <sup>2</sup> s	oui	Common +VDC
SCQ842160	4x25A	12-280VAC	600V	3-32VDC	288A <sup>2</sup> s	oui	Common 0VDC + polarized connector

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 44.5 x 58.2 x 27 mm

## FLASHING RELAYS

The ST6 blinking relays are 12A 12-50VAC or 25A 180-280VAC solid state flashing devices with 6,3mm quick release type connectors. As soon as the unit is powered, it switches loads at a frequency of 1hz or 2hz. An external switch selects the required frequency (1 or 2hz).

## ST6

Product reference	Switching current	Switching voltage	Peak voltage	Flashing frequency
ST645000	10A	180-280VAC	600V	1/2Hz
ST647000	25A	180-280VAC	600V	1/2Hz

These products should be mounted on heatsinks in order to reach nominal current.

• Dim. 67 x 38 x 37.5 mm

# TWO-PHASE SOLID STATE RELAYS

Our two-phase range provides two solid state relays in a compact standard 45 mm enclosure. They are perfectly adapted to three phase applications with breaking of two phases only.

(Connectors to be ordered separately.)

## WIRING EXAMPLES

2 load control wiring  
Single phase

Two-phase SSR SOB to control heaters  
connected in star  
(for balanced low voltage loads without  
neutral connection)

Two-phase SSR SOB to control heaters  
connected in delta  
(for high voltage, balanced or  
unbalanced loads)

## SOB5

→ zero-cross

# THREE-PHASE SOLID STATE RELAYS

*celduc® relais offers further ranges of solid-state relays for controlling three-phase loads. Various models are available, with ratings up to 125 amps per phase, with either AC or DC input, random or zero-cross output.*

## WIRING EXAMPLES

Three-phase SSR SMT8/SGT8 controlling a three-phase motor with a thermal - magnetic protection.

Motor reverser SV9 for three-phase asynchronous motor.

Three-phase SSR SMT/SGT to control heaters connected in star with fuses protection.

Three-phase SSR SMT/SGT to control heaters connected in delta with circuit-breaker.

2 legs three-phase SSR SMB/SGB to control heaters connected in star with fuses protection.

## QUICK AND EASY CONNECTIONS

### cel3pac®

- 100mm version,
- Low profile : Height 34.7mm,
- Better performance terminals to reach higher thermal current limits,
- Large power connections : up to 50mm<sup>2</sup> (AWG1)

### sightpac®

- Compact 45mm version,
- Fixing screws compatible with okpac® and celpac® ranges,
- A visionary range with open future for optional modules.

**SMB8/SMT8** ZERO CROSS FOR MOST TYPES OF LOADS.

**SMB9/SMT9** ZERO CROSS FOR RESISTIVE LOADS AC-51

## SMB

→ 2 leg three-phase SSRs

This range is designed for controlling three phase loads connected in delta or, if balanced, connected in star without the neutral connection. Two of the three phases are switched by the SSR, the third being directly connected.

Product reference	Thyristor rating	Switching current AC-51 (40°C)	Switching current AC-53 (40°C)	Switching voltage	Peak voltage	Control voltage	I <sup>2</sup> t	Protec.

## XKRD SGRD

→ DC Reversing switches

Our SGRD reversing unit for DC motor control offers all the necessary built-in control protections including protection against wiring errors or short circuit on the input. This version includes the interlocking function to avoid control of the two directions at the same time. The ready to use module XKRD30506 for Din-Rail mounting comprises 4 Solid State relays wired as a reverser to be used to change the direction of a DC motor (100W @ 24Vdc).

Product reference	Switching current	Switching voltage	Peak voltage	Control voltage	Protec.	Fig.

2 • Dim. 58.2 x 76.4 x 53 mm

# MOTOR CONTROL

## SYMC

→ To limit peak energy demand!

This new AC single phase softstarter is engineered to the highest quality and is designed especially for single phase motors 32A/230Vac with starting capacitor (e.g. compressor for heat pumps or refrigerating chambers).

This device is designed in compliance with EN60947-4-2.

- Starting current limited to 45A (NFC15-100)
- Over-load motor protection
- Diagnostic information

• Dim. 100 x 76 x 58.5 mm

Product reference	Pmax motors 230VAC	Max. Current AC53a	Specifications

2 = 1 with integrated heatsink

• Dim. 45 x 58.2 x 27 mm

## SMCV SMCW

→ Three-phase AC softstarters

### MOTOR CONTROL :

→ Efficient reduction of torque and starting current.

### INCANDESCENT OR INFRARED LAMP STARTING :

- Reduction of in rush current
- Increase in life expectancy

### TRANSFORMER CONTROL (LOADED) :

- Elimination of saturation current
- Improved control and protection

### WHATEVER YOUR APPLICATION :

- Diagnostic monitoring of line, load & supply as well as normal operational status
- Better balance of and less interference on starters (full control of the 3 phases!)
- Simple use easing implementation and adjustments
- As compact as an electronic contactor

\*The star assembly (Y) corresponds to in-line wired starter. The delta assembly (D) corresponds to the starter wired in the triangle coupling of the motor. Each channel is wired in series with a winding of the motor.

# ANALOGUE CONTROL RELAYS

celduc® relais offers a wide range of controllers with different control modes and input types.

## Types of input control:

0-10VDC, 4-20mA , potentiometer or PWM (Pulse Width Modulation).

## 3 control modes are available:

- Burst control mode controllers
- Full wave pulse controllers
- Phase angle controllers

**A technology for every application!**

## WHICH MODE TO CHOOSE?

→ Comparison of the 3 control modes - setting to 50%

	Working principles	Advantages	Typical applications
<p><b>BURST CONTROL MODE</b></p> <p><b>SO3 RANGE</b> (page 33)</p> 	<p>In the time of a given cycle (here 1 or 2 seconds), the variation of the load power is done by eliminating whole alternations. The distribution of eliminations is carried out according to a complex rule. Thus, in the example shown, the load is only powered to 50% because of the elimination of an alternation out of two.</p>	<p>This type of control allows the power to be finely modulated according to the analogue control, while limiting disturbances.</p>	<p>For the control of resistive loads at low thermal inertia such as the short-wave infrared transmitters (infrared tubes)</p>
<p><b>FULL WAVE PULSE CONTROLLERS</b></p> <p><b>SG5 RANGE</b> (page 34)</p> 	<p>In the time of a given cycle (variable depending on the models), the variation of the load power is done by eliminating whole alternations. The elimination is done linearly following the cyclic Ton/Tcycle report requested by the control input. Thus, in the example opposite, the load is only powered 50% of the time of the cycle (Ton/Tcycle=0.5).</p>	<p>This type of control presents the advantage of not generating interference since start-up is near 0 voltage.</p>	<p>Adapted to loads with high inertia (industrial furnaces).</p>
<p><b>PHASE ANGLE CONTROLLERS</b></p> <p><b>SINGLE PHASE</b> <b>SG4 - SO4 - SIL4 - SIM4 RANGES</b> (pages 32-33)</p> <p><b>THREE-PHASE</b> <b>SGTA AND SVTA RANGE</b> (page 35)</p> 	<p>On the principle of the light dimmer, this control mode allows a very fine control of the load power by removing a part of the the mains voltage sinusoid in accordance with the control input. The proportional response between the input control and the output power depends on the controller model and can be linear in angle, <math>U^2</math> or in Urms. Thus, in the example below, the load is only powered to 50% because of the elimination of the half of the half-alternations of the mains voltage.</p>	<p>This control mode allows the load power to be finely adjusted, for example, when the refinement of the temperature regulation takes precedence over the electromagnetic disturbances generated by this type of solution (a filter is recommended).</p>	<p>Mainly for loads that react quickly when faced with voltage variation (lamps, motors). Also for DC loads behind a rectifier bridge (heated wires, Peltier effect modules).</p>

# ANALOGUE CONTROL RELAYS

## SG4

→ Single phase angle controllers

This relay is designed to proportionally vary the switching point on a sinusoidal mains supply via an isolated analogue control signal thereby varying the RMS voltage at the terminals of the load. Applications : light dimmer, heating regulation, single phase variable speed control (vibrating feeders,etc). Model with LED and RC and VDR network.

Product reference	Thyristor rating	Switching voltage	Control voltage	I <sup>2</sup> t	External power supply required ?

• Dim. 22,5 x 80 x 116 mm

• Dim. 45 x 80 x 116 mm

## SO3

→ Burst control mode  
( $\mu$ P based unit)

This control mode is particularly suitable for resistive loads having a low thermal inertia like short wave Infra Red sources (IR lamps). It allows a very fine control of power according to the analogue input signal while reducing noise emission level (EMC conducted emissions). This control mode consists in switching streams of full sine waves equally distributed along a fixed modulation period (TM) function of the analogue input signal. The  $\mu$ P constantly computes the number of full sine waves to be switched along the TM period.

## MULTIZONES POWER CONTROLLER

NEW

Taking into account the identified needs of the market, celduc® relais has developed infrared lamp temperature control boxes. The technology used, based on solid state relays for power connected to a complex electronic, helps to ensure power control up to 12 lamps in a precise and efficient way. A program allows the PLC to be informed of the operating state and possible faults in the manufacturing process.

### Characteristics of the control boxes:

- Heat box for a maximum of 12 IR channels (4kW max. per channel and 36kW max. per box)
- U<sup>2</sup> type mains variations compensation (syncopated)
- Detections: broken lamp < 250 ms; over/undervoltage; overheating; broken fuse
- Built-in protection
- Control by Profi bus DP

# ANALOGUE CONTROL RELAYS

## SG5

→ Full wave pulse controllers

This relay has an analog input isolated from the mains to proportionally vary the cyclic operating ratio of a load (t/T). Control and mains are synchronous and output only has full periods. Models supplied with LED indicators together with RC & VDR network protection.

Product reference	Thyristor rating	Switching voltage	Control voltage	I <sup>2</sup> t	External power supply required ?

• Dim. 100 x 73,5 x 39,5 mm

For higher power ratings and three phase applications, ask for our application notes. These products should be mounted on heatsink in order to reach nominal current.

## SWG5

→ Single phase power controllers

This range is based on the SG5 controllers. The SWG5 are fitted with heatsinks and DIN rail adapters. Application : single phase heaters.

Product reference	Switching power	Switching voltage	Control voltage	External power supply required ?	Fig.
SWG50210	2kW	230VAC	0-10VDC	no	1
SWG50810	8kW	230VAC	0-10VDC		2

Control voltage 0-5V or potentiometer on request.

• Dim. 100 x 74 x 56 mm

• Dim. 100 x 110 x 96 mm

## SWG8

→ Three-phase power controllers

The SWG8 controllers consist of a control unit (0 to 10 VDC input) and a power unit adapted to three phase load. The control unit has got an analogue input, isolated from the mains, that can proportionally alter the power to the load. Application : three-phase heaters.

Product reference	Switching power	Switching voltage	Control voltage

# THREE-PHASE PROPORTIONAL CONTROLLERS

## SVTA

- Allows control of any type of loads (except capacitive) 3 or 4 wires (neutral), delta or star wiring :
  - Resistive loads for temperature control (infrared lamps, kilns, resistors,...)
  - Resistive loads for light control (bulbs, halogen, UV, scenes,...)
  - Loads including a transformer, a coil or a rectifier for voltage control (power supplies, high voltage generators,...)
  - Motors for voltage speed control (Possibility to reduce the speed depending on the type of motor and machine, motor fans,...)

- Six thyristor proportional phase angle controller (Three phase positive and negative cycle control) : Balanced currents, less harmonics, ...
- Softstart and softstop ramps (increases the lifetime expectancy of the assembly)
- Diagnostic functions
- Compact housing.

Product reference	Max. current AC-51	Max. current AC-53a	Control	External power supply required ?

SVTA4694E	125A (*)	30A	4-20mA	

\* Max. wire size = 10mm<sup>2</sup> : double wires or use special adaptors for current > 50A.  
Please refer to the mounting instructions.

• Dim. 100 x 76 x 58.5 mm

## SGTA

### • MAIN CHARACTERISTICS •

- Small housing
- Wide mains frequency variation (40-65Hz)
- Built-in overvoltage protection
- High I<sup>2</sup>t power elements
- Fully optoisolated full cycle three phase phase angle controller (balanced currents, less harmonics, ...)
- The minimum voltage applied on the load is the lowest in the market (3% RMS on the nominal voltage against 40% RMS offered by our competitors !)
- Lots of possible options on request
- Manufactured in compliance with major international standards EMC, LVD, UL, VDE.

### • TYPICAL APPLICATIONS •

- Resistive loads for temperature control (infrared lamps, kilns, resistors, ...)
- Resistive loads for light control (bulbs, halogen, scenes, ...)

Product reference	Max. current AC-51	Switching voltage	Control	External power supply required ?

Other rating on request.

• Dim. 75.15 x 100 x 46 mm

# DC SOLID STATE RELAYS

These relays are designed to switch DC loads e.g solenoid valves, brakes, indicators, motors (possibly on AC mains under specific conditions). All possible technologies can be available :

- **MOSFET**  
For applications where overcurrent capability and low dissipated power are needed.
- **BIPOLARE**  
For applications where low control current is needed.
- **IGBT**  
For high voltage applications (> 600 VDC).

FOR EACH APPLICATION THE CORRESPONDING TECHNOLOGY !  
STANDARD RANGE UP TO 1200VDC, 150A.

• Dim. 28 x 5 x 15 mm

Nominal voltage

• Dim. 29 x 12.7 x 15.7 mm

• Dim. 44.5 x 58.2 x 27 mm

Products without integrated over-voltage protection (transil or VDR) or having only a Freewheel diode, must be fitted with an external overvoltage protection. The maximum operating voltage is then often reduced to the half of the specified maximum operating voltage.

**With celduc® relais,  
DC power switching  
under control !**

• Dim. 157 x 68 x 83 mm

On request : "ready to use" products i.e. products including integrated voltage protection, proportional controllers, DC motor reversers ... Please consult us !"

## APPLICATIONS

**DC power supplies** (converters like choppers, inverters, ...)

**Signal switching** (testing equipment, ...)

**Electro-magnets** (induction motor braking, ...)

**Heaters** (air conditioning in trains, tramways, ...)

**Batteries** (ships, solar systems, ...)

**DC Motors** (travelling cranes, cranes, vehicles, ...)

The Rth values are given for a temperature of 50°C in calm air. Other dimensions available on request.

## ACCESSORIES

### PROTECTION COVERS / FLAPS

1K199000	Protection cover for SGT/SG9
1K460000	Protection cover for SC range (except SCB and 125A rating SC)
1K470000	Protection cover for all SC/SCB range
1K522000	Protection cover for SA-SAL
1K523000	Removable protection flaps for SU-SUL

### MARKING LABELS

1MZ09000	marking labels to be mounted on protection flaps or covers for SA SU
----------	--

### MOUNTING KITS

1L386100	6.3 mm angled Faston 45° for SO
1L382300	4.8mm angled Faston 45° for SO
1LK00100	mounting SC-SO-SF-SM-SU on heatsink or SC-SO on 1LD12020
1LK00200	mounting SG-SVT-SV9 on heatsink or 1LD00500
1LK00300	mounting heatsinks on 1LD00400 or SC-SO on 1LD00000
1LK00700	special kit for high current (okpac range)

### DIN RAIL ADAPTORS

1LD00400	DIN rail adaptor for WF21/07/05
1LD00500	DIN rail adaptor for SG/SVT/SV969300
1LD12020	DIN rail adaptor for SC/SO vertical mounting

### THERMAL SEALS RELAY/HEATSINK

5TH15000	thermal grease for 30 relays SG/SVT ou 60 relays SC/SO
5TH21000	thermal precut film for SC/SO
5TH23000	adhesive thermal pads for SC/SO
5TH24000	adhesive thermal pads for SA/SU

1LWP2300	Assembling costs 5TH23000 on SC/SO + 5TH23000
1LWP2400	Assembling costs 5TH24000 on SA/SU + 5TH24000

### MOUNTING+HEATSINK+DIN ADAPTOR OPTION

1LWD1202	mounting of SC/SO sur 1LD12020 + 1LD12020
----------	---

### MOUNTING OPTION ONLY

IF QUANTITY > 10 (screw kit included)

1LW00000	mounting of relays on heatsink
1LWD0000	mounting of heatsink on DIN rail adaptor

# MAGNETIC SENSORS

## MAGNETIC PROXIMITY SENSORS

### We are the experts

If you are looking for position, presence, level or speed detection, then we will be able to offer a solution from our range of magnetic sensors. We can even design a specific product for your applications !

At celduc® relais, we are eager to offer the best products for your application, thanks to our 45-year experience in the key technologies that we use in our products :

- Reed switch, a dry contact in a sealed glass bulb providing insulation at the same time : a simple, reliable and low cost solution.
- Electronic cell, based on either magneto-resistance or Hall effect, necessary for higher performance, particularly in high frequency operation."

### INDUSTRY

Counting  
Cylinder positions  
Machine safety  
Advertising panel  
Actuator position  
Liquide level  
Speed control

### HOME

Burglar alarm  
Camera shutter control window position (blinds)  
Lifts  
Alarms  
Big and small household goods  
Swimming-pools

### AIRCRAFT, SPACE AND ARMY

Level of fuel and petroleum products  
Level of oil and water  
Sensors and actuators for Airbus  
Camera shutter control

### SPECIFIC APPLICATIONS

ATEX  
(explosive atmospheres)

# MAGNETIC SENSORS

## WHAT IS A MAGNETIC PROXIMITY SENSOR?

The sensitive element of the magnetic sensor may be a Hall cell, a magnetoresistive cell or a Reed switch detecting the presence of a magnetic field, in general a permanent magnet. It detects the position of the magnet without contact and transmits an on/off or analogue electric signal, according to the models.

## REED SWITCH SENSORS

The REED switch or Flexible Blade Switch is composed of two or three ferromagnetic blades sealed in a glass tube filled with an inert gas, which will come into contact under the influence of a magnetic field.

### THERE ARE DIFFERENT CONTACT TYPES

- NO / A Form > Normally Open
- NF / B Form > Normally Closed
- BISTABLE NO / L Form
- CHANGE-OVER / C Form

### THE MAIN ADVANTAGES ARE:

- No power supply necessary,
- Operates in harsh environments,
- The sensing ranges can be very large (depending on the magnetic sensitivity of the bulb, the power of the magnet as well as the magnetic environment),
- Economic solution.

**REMINDER :** Reed switches and magnetic sensors using reed switches can switch AC or DC current. In our technical datasheets the values given for current and voltage are the maximum values. It means that in DC applications it corresponds to the max. switching current and voltage. In AC applications these values are the peak values, to obtain the nominal value you should divide by 1,414.

## ELECTRONIC SENSORS

Their principle of detection is based on the occurrence of a voltage proportional to the magnetic field on the Hall sensors and on a change in resistance also proportional to the magnetic field on the sensors fitted with magnetoresistance. The variations of these signals are processed in the sensor to release an On/Off signal or analogue signal to the user according to the client's needs. These sensors need a power supply.

### THE MAIN ADVANTAGES ARE:

- Operates at high frequency: >20 kHz.
- Not sensitive to shocks and vibrations.
- Long lifespan

## CONTROL MAGNETS

To control Reed switch or HALL effect cell magnetic sensors, a magnet must be used. Go to page 54 to consult our complete range of coated and uncoated magnets.

### CHOICE OF THE SENSOR/MAGNET PAIR MUST BE MADE ACCORDING TO THE TERMS OF USE

- Activation distance sought (action and release),
- Temperature of use,
- Operating mode (Perpendicular or parallel movement? Nose-to-nose activation?),
- Geometry,
- Corrosion resistance desired

**REMINDER:** The guaranteed activation distance depends on the sensitivity of the sensor and of the power of the magnet. As a guideline, in this selection guide, we clarify the guaranteed distance of activation with a given magnet but celduc® remains at your service to offer the best magnet/sensor pair according to your needs.

# MAGNETIC SENSORS

## SPECIAL CUSTOMERS PRODUCTS

MORE THAN 50% OF THE SENSORS ARE MADE ACCORDING TO CUSTOMER SPECIFICATIONS. HERE ARE A FEW EXAMPLES:

### AIRCRAFT INDUSTRY

Serving this industry is proof of reliability. celduc® relais has developed special sensors to detect the opening/closing of the doors as for example push-buttons used to detect open/closed doors in Airbus A380 ; sensors to detect tank refueling in Mirage Rafale and Saab Jas 39 fighters ; level sensors for AIRBUS humidifiers, ...

### NUCLEAR POWER

celduc® relais has designed and made sensors used for nuclear reactor regulation. These sensors are part of the system's highest security level. The qualification phase has therefore been very important in this project and our sensors have been tested in extreme situations. This development of sensors for nuclear reactors demonstrates yet again celduc® relais ability to create specific solutions in fields where reliability is essential.

### AGRICULTURE

In agriculture, there are many ways in which our magnetic sensors can be applied. celduc® has developed a magnetic proximity sensor for metal detection. No more need for magnets!

**A TEAM OF EXPERTS AT YOUR SERVICE**

## SENSORS AND CONNECTED OBJECTS

Connect our sensors thanks to our energy efficient mobile communication solutions! Using networks made for the internet of things, our energy efficient wireless connection modules can connect all types of detection needs. Thanks to our professional expertise in the field of magnetic detection and the combination of reed technology and LPWAN networks (low-power wide-area network), our sensors are:

- **autonomous:** up to 10 years of uninterrupted use without changing or recharging the batteries,
- **connected:** directly access the status of your position and level sensor from your mobile or computer and be alerted of any changes,

→ **simple to use:** no SIM card or complex parameters, manage your sensors directly from our web platform and connect anywhere in the world with the same model,

→ **economical:** much more affordable than traditional mobile networks, LPWAN solutions are particularly well suited to connected sensors and now cover more than 90% of world territory.

# SAFETY MAGNETIC SENSORS

These products are designed to protect the operators OF machines when opening doors, casings or covers, by stopping dangerous movements of the machine.

## A SOLUTION FOR ALL LEVELS OF SAFETY REQUIRED!

**3 SAFETY LEVELS ACCORDING TO STANDARDS EN/ISO 13849-1 / EN/ISO 62061:**  
The latest safety standards are based on concepts such as the security level (SIL) or the performance level (performance level = PL).

**SIL 1  
PL = C**

**SIL 1 / 2 / 3  
PL = C / D / E**

**+SAFETY MODULE ADAPTED**

**SIL 2 / 3  
PL = D / E**

**ADVANTAGE: Autonomous system not needing a safety module**

## P3S / P4S

- These compact products are very easy to incorporate onto the machines
- Fully electronic with a high level of encryption (inviolability),
- High resistance to shocks and vibrations
- Self-protected solid state outputs (short-circuit of the load and temperature)
- Virtually unlimited sensor life (very high MTTFd)
- For industrial machines with one or several doors or imprecise guidance casings.

### SENSORS FOR LIFTS

- Detection of the lift position
- Doors opening control

**celduc® relais** offers a wide range of magnetic sensors for elevators with reed switches or "Electronic" magnetic sensors using an Hall effect cell or magneto resistance.

The magnetic field created by the permanent magnet, activates the sensitive part (the reed switch or the Hall effect cell or the magneto resistance). It is important to combine the magnet and sensor with consideration to the correct operating conditions (switching distance, presence of ferro-magnetic parts or non ferro-magnetic parts...).

**celduc® relais** is at your disposal to help you define the right products.

- Advantages :
- insensitive to the ambient working conditions (heat or cold air, humidity, dust...)
  - high reliability
  - large detection distance
  - good reliability to shocks and vibrations
  - IP67

# REED MAGNETIC SENSORS

## LEVEL & FLOW SENSORS

### IoT Solutions

Connect our Reed sensors to a communication system so that they are autonomous and connected. (see page 41)

celduc relais® offers a large range of standard or specific level and flow sensors using Reed switches. Our sensors are available in plastic, brass or stainless steel housing, making it possible to use them with various chemical substances and/or operating temperatures. With some sensors, it is possible to invert function by reversing the float or using the sensor upside down. Please see the data sheets for more details. For specific applications (e.g. potentiometric scale, special level sensors) do not hesitate to contact us : products can be developed on request.

(1) Possible to invert the functions by reversing the float  
(2) Available in ATEX version (see page 53)

VERTICAL LEVEL SENSORS

## LIQUIDS COMPATIBILITY

- 1** → Compatible with acid : acetic, citric, formic, lactic, nitric diluted, phosphoric, sulphuric diluted ; soda ; alcohols : ethanol, methanol, propanol ; glycol ; mineral oil ; water  
→ Not compatible with the following solvents : chloroforme, methylene chloride, trichloroethylene, toluene ; hard acids.
- 2** → Compatible with fuels, engine oil, kerosene, lubricating oil, mineral oil, vegetal oil,  
→ Not compatible with almost all acids, methylene chloride  
→ Acceptable resistance to water.
- 3** → > Compatible with almost all the liquids except hard acids.

# REED MAGNETIC SENSORS

## WORKING PRINCIPLE

A float fitted with one or more magnets moves with the liquid and actuates, due to its magnetic field, a hermetically sealed reed contact located in the body of the float.

## ADVANTAGES

The below advantages allow a safety use, repetitiveness, precision and minimum maintenance.

- One moving part.
- The Reed contact is actuated by a magnetic field only : no contact so no wear.
- The Reed contact is completely isolated from the liquid so perfectly waterproof.

## APPLICATIONS

### HEATING (air-conditioning, heaters, humidifiers)

→ To detect the water level in the tank.

### DOMESTIC EQUIPMENT (electronic flush, solar systems)

→ To detect the water level.

### FOOD INDUSTRY (coffee machines, vending machines)

→ Check the level of water left in the tank.

### MEDICAL EQUIPMENT (sterilising equipment for medical instruments)

→ Check level of water for steam or liquid detergent level.

### WATER TREATMENT (water purifying, desalinating)

→ The sensors enable the reserve water level to be established.

### SWIMMING POOLS (water treatment, water heating)

→ Water level and flow.

### AUTOMOBILE (radiator liquids level, windscreen washer, engine oil level, brake oil level)

→ Detection of liquids levels.

### VARIOUS INDUSTRIES (photo lab equipment, scrubber machines, fuel dispensing systems).

## SENSORS FOR WINDOW FRAMES

### IoT Solutions

Connect our Reed sensors to a communication system so that they are autonomous and connected. (see page 41)

This new range has been developed to detect position of the window : open or closed (supervising of openings). Typical applications are alarm, heating, air-conditioning systems.

Main advantages are :

- Save time for mounting and wiring : pluggable connector, product to be clipped (no fixing screws)
- Normally open (NO), normally closed (NC), change-over contact, safety current loop
- Water-proof contact.

### MOUNTING & WIRING TIMES MUCH SHORTER !

#### 1 Drilling

#### 2 Connecting

#### 3 Positioning

#### 4 Locking

Product reference	PWA01501	PWB01501	PWA11500	PWB11500	PWC01500
Type of contact	NO	NC	NO + safety loop	NC + safety loop	Change-over
Contact status	Window open				
	Window open				
Connection type	Cable + PHR2 connector (not included)		Cable + PHR4 connector (not included)		
Cable length	Ref. 2YB20031 : 3m Ref. 2YB20051 : 5m Ref. 2YB20111 : 10m Ref. 2YB20131 : 13m Ref. 2YB20151 : 15m Ref. 2YB20251 : 25m		Ref. 2YB40080 : 8m		
Max. switching power	10VA				
Max. switching voltage	48VAC 100VDC				
Max. switching current					
Activation distance	Depend on the magnet - see technical data-sheet				
Working temperature	-40 to +70°C				
Dimensions (mm)	47.7 x 9.7 x 9.1				

**Magnet PW520000**  
to be clipped

**Magnet UR124540**  
to be screwed

**Magnet UZ189538**  
to be glued

# ATEX SENSORS

**celduc® relais** is notified as manufacturer of ATEX products :  
 INERIS 04ATEXQ406 and offers a wide range of ATEX sensors.  
**celduc® relais** has EC-type examination certificate Nr. INERIS 04ATEX0105.  
 Groupe II : Open-air industry (other than mines) with possible inflammable dust.

## IoT Solutions

Connect our Reed sensors to a communication system so that they are autonomous and connected. (see page 41)

Marking example : for part number PL.1...Ex (for other part numbers, please refer to our technical data-sheet)

**CE0080 II 2 GD Ex mb IIC T6 Gb Ex tb IIIC IP67 T85°C Db II 1 GD Ex ia IIB T6 Ga Ex ia IIIB T85°C Da**

Type  of devices :  
 1 for zone 0 (continuous risk)  
 2 for zone 1 (intermittent risk)

Gaz : G or Dust : D  
 Protection "m" for zone 1 and "i" for zone 0  
 Temperature class : T6 (85°C) T4 (135°C) or T3 (200°C)  
 Cables length 5m or 10m.

# CONTROL MAGNETS

Range of standard permanent magnets used as actuators for our magnetic sensors. Our range of magnetic sensors with reed switches or "Electronic" magnetic sensors using a Hall effect cell should be actuated with the correct magnet. **celduc® relais** offers 3 families of magnets to be chosen according to the application (working temperature, geometry, resistance to corrosion).

Material		Max. operating temperature	Derating according to temperature (recoverable)	Resistance to corrosion	
Alnico		500°C	very low (-0.025% per °C)	Good resistance	generally supplied in bars which should have a length of minimum x4 the diameter
Ferrite		250°C	high (-0.20% per °C)	Very good resistance	generally supplied in parallelepiped block, disc or ring
Rare earth	Samarium Cobalt (SmCo)	250°C	low (- 0.04% per °C)	Very good resistance	generally supplied in blocks or granulates
	Neodymium Iron Bore (NdFeBo)	80 to 160°C (see data-sheets)	low (- 0.10% per °C)	Bad resistance (must have tin or nickel coating)	generally supplied in blocks or granulates

**celduc® relais** is at your disposal to help you define the correct magnet/sensor arrangement according to your needs / operating conditions.

# REED RELAYS & SWITCHES

Detection : Clearance, position, level, presence  
Switching : Telecom, tester, measurement

## REED SWITCHES & MERCURY TILT SWITCHES

Detecting a clearance, a position, a level in extrem environments without mechanical link between the moving parts and without maintenance, such is the daily challenge of the Reed contact submitted to a magnetic field in industrial sectors as various as money, space, control, telecom...

Product reference	Contact status	Max. switching voltage	Max. switching current	Max. switching power	Standard sensivity range	Glass length
